PDAC Sustainability Forum

Minerals and Metals in a Low Carbon Economy

Saturday, March 3rd, 2018 (1300-1700)

at the 2018 PDAC Convention in Toronto, Canada

The IGF, WEF and PDAC will be co-hosting a Sustainability Forum on the sidelines of the 2018 PDAC Convention. This Sustainability Forum will discuss the important role that minerals and metals will play in the mining sector to help shift to a low carbon economy. This will include topics such as green energy, low-carbon technology, responsible sourcing, capacity needs for geological mapping, and implications for the SDGs.

The main event will commence at 1:00 p.m. with a panel discussion introducing the topic. Delegates will then separate into roundtable discussions focused on exploring the theme in depth. The event will then close with feedback from the roundtables and a closing panel discussion.

If you are interested in attending this invitation-only event please contact the IGF Secretariat at Secretariat@IGFMining.org

For more information on the conference, please visit the event website: www.pdac.ca/convention
